Request and Consent for the IUD Copper T 380A (ParaGard®)

Voluntary Participation and Confidentiality Statement: Title X services are provided solely on a voluntary basis. Individuals must not be subjected to coercion to receive services or to use or not to use any particular method of family planning. Acceptance of family planning services must not be a prerequisite to eligibility for, or receipt of, any other service or assistance from or participation in any other programs of the applicant. This information is confidential and will be treated as such.

Birth control methods may have good or bad side effects or complications, which may be harmful to me. I have been told that the most frequent benefits, risks and side effects are those listed below. Others not listed may occur.

Copper T 380A (ParaGard®) Use Effectiveness: 99.4–99.6 Percent

Benefits	Possible Risks/Disadvantages	Possible Side Effects
1. Highly effective	1. Infection occurs rarely within the first few days after insertion.	1. Increased menstrual bleeding
2. Contraception lasts for 10 years	2. IUD may go through the uterus. This is called perforation.	2. Increased menstrual cramping
3. Gives freedom for greater sexual spontaneity	3. The IUD may come out by itself. Use of a backup birth control method would be required for expulsion.	
4. Easily reversible	4. Missing IUD threads/strings—your provider can usually remove an IUD with missing threads in the office. Rarely, you will need minor surgery to remove an IUD with missing threads.	
5. Convenient	5. No protection from sexually transmitted diseases including HIV	
6. Does not change the composition of breast milk or the volume	6. Allergy to copper	
7. Reduce risk of ectopic pregnancy		
8. Cost effective		

Contraceptive Technology 20th ed. 2011

- I do not wish to become pregnant now. One benefit of choosing a method of birth control is that I will be better able to delay a pregnancy until it is desired.
- All contraceptives offered by this clinic have been explained to me. I may change to another method if medically recommended. Also, I may stop using a birth control method if I wish to become pregnant. Instructions for the use of my chosen method have been given to me.
- I understand that to continue the use of the copper IUD, I must come to the clinic for my yearly check up. It is my responsibility to schedule my yearly health check. I also understand it is my responsibility to check for the IUD strings monthly and call my health care provider if I am unable to locate the strings.
- I understand that if any of the following danger signs occur severe abdominal pain, unexplained fever or fever after insertion, pelvic pain or pain during sex, unusual vaginal discharge, genital sores, cannot feel the IUD strings, have severe or prolonged vaginal bleeding or if partner has a sexually transmitted disease, I know to seek medical attention immediately.
