

# Pregnancy Care Management Prioritization Using MIIS Score (new referrals as of June 1, 2017)

- Initiate care management relationship.
- Assess patient's level of need and plan services accordingly.
- Only defer if appropriate, after reviewing with supervisor, if MIIS score remains <200.

† Guidance for case review/use of professional judgment

**CMIS:**  
 Review Demographics page  
 Review prior pregnancies: risk screens, pregnancy assessments, task notes  
 Review Comprehensive Health Assessment

**Provider Portal:**  
 Review Visit History: types of providers, behavioral health services, ED utilization, hospital admissions  
 Review Total Cost  
 Review Medications: use the "complete history" tab

- Initiate care management relationship.
- Provide services through postpartum period.
- Defer, after reviewing with supervisor, only if unable to locate or engage patient.

- Review case† and use professional judgment to determine if services are needed.
- Initiate care management if care manager determines services are needed.
- Only defer if appropriate, after review, if MIIS score remains <200, for "does not meet screening criteria".
